

WINDOWS

SLIDING WINDOW • CASEMENT WINDOW • LOUVER WINDOW • AWNING WINDOW

A wide range of design configurations ideal for any architectural application.

SLIDING WINDOW is a reliable choice for design flexibility. It is used to enhance a building's characteristics with economical design.

AWNING WINDOWS are hinged from the top opening outward, letting air circulate freely. Tending to operate in reverse. The awning lets out more air than it lets in, which makes it perfect for kitchen and bathroom applications.

CASEMENT WINDOWS swing open up to 90 (like a door) with superior ventilation, while the large glass has unobstructed views and bathe your rooms bright.

SLIDING DOOR • SWING DOOR • BI-FOLD DOOR • FRAMELESS SHOWER ENCLOSURE

DOORS

SLIDING DOORS

Sliding doors have a heavy duty frame for added strength and durability with full locking options, as well as an internal sliding sash, increasing security and safety.

French or Hinged doors make a stylish replacement for traditional wooden doors. Combined with various fixed window designs, hinged doors can become a unique feature in your home.
